

## **Github**

Use github for storing work that I have worked on in university or my own time. Can also be used as a portfolio for job applications.

Research dream company that I would want to work at and see how to be an intern there.

Promote your github by putting it on your cv, post projects on linkedin.

## **Concept**

Have a concept like a game or a calculator. Any project that I want to make

## **Programming language**

Use a language that I know

## **Discipline**

Use a discipline such as OOP, functional driven programming

I want to learn Java so i can work at a company that is called Accenture. They have a software engineering role in London.
